

1. Otwieramy rozwiązanie Lab9-05
2. Dodajemy Folder Database PPM -> Project -> ADD -> New Folder -> Zmieniamy nazwę na Database

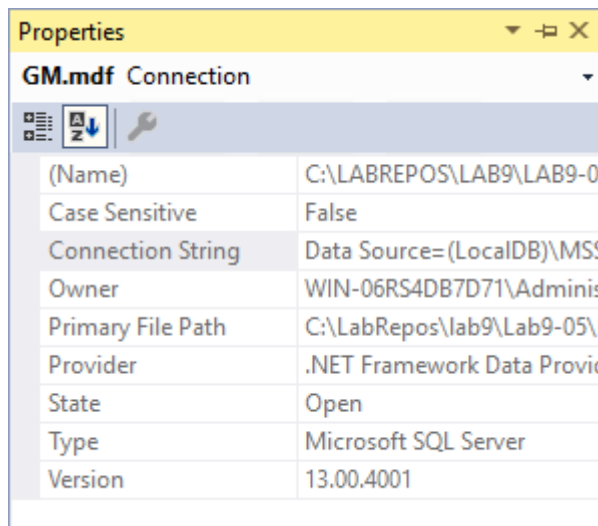

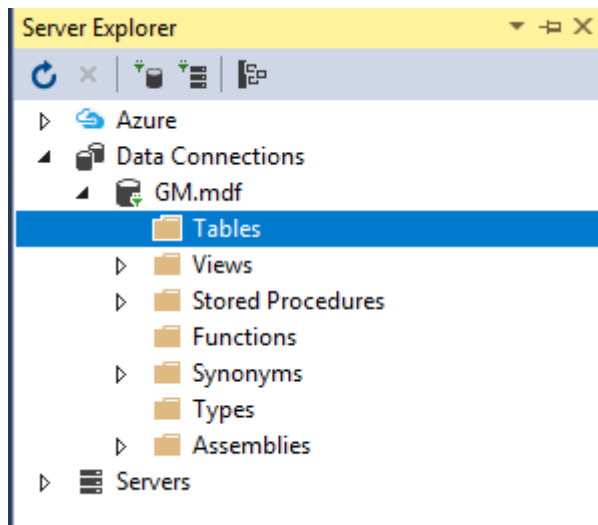

3. Dodajemy do projektu bazę danych Database->PPM->ADD ->New Item -> Data -> Service-based Database. Zmieniamy nazwę bazy danych na GM.

4. Dodajemy połączenie do bazy danych DBClick na pliku bazy danych-> Server Explorer -> Data Connections -> GM.mdf -> Properties -> Connection String

Otrzymujemy :

Data Source=(LocalDB)\MSSQLLocalDB;AttachDbFilename=C:\LabRepos\lab9\Lab9-05\Database\GM.mdf;Integrated Security=True

Dodajemy Sekcje do pliku app.Config

```
<connectionStrings>
```

```
<add name="Test" connectionString="Data
```

```
Source=(LocalDB)\MSSQLLocalDB;AttachDbFilename=C:\LabRepos\lab9\Lab9-05\Database\GM.mdf;Integrated  
Security=True" providerName="System.Data.SqlClient" />
```

```
</connectionStrings>
```
